PC CHAT Computer Radio Show featuring Mr. Modem

Live Call Thursday at 7:00pm and Saturday at 2:00pm | Toll Free - 888.437.7660

email questions to: questions@pcchatshow.com

► This Week's Guest on PC Chat:

Adobe Interview | Mike Descher will be on to talk about the new PhotoShop product, and give one or two of them away to you listeners! Mike will also be at MacMedia here in town for a demo this Friday (www.macmediainc.com)

Adobe helps people and businesses communicate better through its world-leading digital imaging, design, and document technology platforms for consumers, creative professionals, and enterprises.

Adobe's platform-driven approach is focused on providing more complete and innovative solutions for each of its customer segments than ever before. With its digital imaging and digital video software products, including gold-standard Photoshop software and a comprehensive professional digital video platform, Adobe is helping customers edit, manage and share digital images and video with the highest quality results. Adobe delivers the leading platform for the future of design and publishing, giving creative professionals everything they need to create and publish content to print and the Web faster, more easily, and more efficiently. And the Adobe Intelligent Document Platform enables organizations to connect employees, customers, and partners with information through the use of Adobe's PDF file format—the de facto standard for secure electronic document exchange.

StealthSurfer | StealthSurfer will join us by phone tonight. Why StealthSurfer?

- Your computer AUTOMATICALLY records every move you make! Anyone with basic computer knowledge can view where you've been on the Web.
- Deleting this information does not permanently remove it from your computer – nor does emptying your 'Recycle Bin.' Even clearing your browser's cache and 'History' files will not fully remove lingering data. Privacy and cleansing software also risk leaving data remnants on your hard drive and are not 100% efficient!

The only way to truly ensure privacy is to keep your files and data close at hand. With StealthSurfer, you take your browser and all other sensitive information with you when you leave your computer. Should your StealthSurfer fall into unwanted hands, password protection maintains your data's privacy and security.
